

Student: And you said that this should be--this section, little thing here, should be up in the Methods?

Instructor: Yeah, exactly because you're describing--that's part of how you processed your data so that's in the What-You-Did not What-You-Found section.

Student: Here? No. Here?

Instructor: Yeah, it could be in the Data Collection or, maybe--yeah, no, I think Analysis makes more sense because that's where you, after you collected it, you started analyzing it and part of what you did to analyze it was you changed the names.

Student: Okay. I'm just going to throw it up there real quick.

Instructor: Cool.
