

This is supplementary material for Stephen J. Quigley, Abigail Zimmerman, Raquel Buege, Destin Natele Cappello-Perez, and Ashanti Duncan's webtext, "Exploring Sustainable Design," published in *Kairos: A Journal of Rhetoric, Technology, and Pedagogy*, 30(1), available at <http://kairos.technorhetoric.net/30.1/praxis/quigley-et-al>.

Transcript of Interview by Linda

Linda: What did you see?

Interviewee: I saw a lot of sustainable things and projects.

Linda: What did you learn?

Interviewee: I learned that the sustainable project that I was seeing were doing helpful things and being efficient.

Linda: What surprised you?

Interviewee: I was surprised about the thriftstore.

Linda: What was your favorite project?

Interviewee: I think the thrift store because it's helps the students like the students can donate. And then they can sell them I mean they can buy them and like give them away donate yeah.

Linda: Why is sustainable design important?

Interviewee: Because it's sustainable and it helps things and it can...it's not waste, yeah.

Linda: What are efficient sustainable design projects?

Interviewee: I liked the rain Gardens. The rain Gardens were very efficient because it's like grass and people can sit out in kind of nature, but it's also good for the environment the bees.

Linda: What is the project that stood out to you most?

Interviewee: I think the bikes. The bikes because they like repaired the bikes and they made bikes and then they sold the bikes.

Linda: Amazing.
