

This is supplementary material for Stephen J. Quigley, Abigail Zimmerman, Raquel Buege, Destin Natele Cappello-Perez, and Ashanti Duncan's webtext, "Exploring Sustainable Design," published in *Kairos: A Journal of Rhetoric, Technology, and Pedagogy*, 30(1), available at <http://kairos.technorhetoric.net/30.1/praxis/quigley-et-al>.

## Transcript of Interview by Robert

Robert: All right what did you see?

Interviewee: I saw green roofs, pollinator gardens, and rain gardens

Robert: What did you learn?

Interviewee: I learned about storm water retention.

Robert: What surprised you?

Interviewee: I was surprised when we learned that the field garden collected 10,000 gallons of water.

Robert: What was your favorite project that you worked on?

Interviewee: My favorite project was the bike cave because it was cool

Robert: Okay why is sustainable design important?

Interviewee: Sustainable design is important because we need things to last longer

Robert: All right that's good.
